

**Senfor International**  
Management and Business Advisors

## International Management and Business Consultancy

### The route to success

- Strategy
- Management
- Performance
- Technology

*In today's business environment, to be well accompanied can make all the difference !*

### Senfor International Management and Business Consulting

As a preferred partner our purpose is to accompany our clients in their transformation projects ultimately leading to a sustained increase in operational performance.

Our advisors are seasoned professionals with an average of 20 years experience in management and business services.

We are part of an European network providing strategic, design and implementation advice in our clients transformation projects.

### Our Customer Commitment

Our commitment is based on the principles of

- ⇒ high value added advice
- ⇒ respect of our engagements
- ⇒ strictness in managing our projects

A detailed knowledge of the business and requirements of our clients  
from many years of experience in specific sectors of activity

- ⇒ Manufacturing industries
- ⇒ Aerospace and Defense
- ⇒ Medical Devices
- ⇒ Energy
- ⇒ Distribution

Senfor International business services are available throughout the entire business lifecycle. However we realize that clients may require solutions which contain a mix of these services.

*Which of these areas are of interest to **You**?*

**Our key areas of expertise in the transformation process**  
in order to provide a proposition of value the best suited to  
the context and requirements of our clients projects

- ⇒ Operational excellence
- ⇒ Innovative solutions
- ⇒ Administrative and financial performance
- ⇒ Client experience

**Our approach to the transformation projects**

- ⇒ Business domain and processes
- ⇒ Culture and motivation
- ⇒ Performance
- ⇒ Technology

**Our services** assist from the initial assessment phase, to assess the potential of any project, through the definition phases to the integration and inauguration of the final solution:

- ◆ Project and Change Management
- ◆ To assist in defining the best strategy and taking the correct decisions
- ◆ Analysis of client requirements with current business processes
- ◆ Design of the functional solution
- ◆ Selection and implementation of any appropriate technology
- ◆ Training
- ◆ Support
- ◆ International Deployment
